

Election Security in Iowa

MYTH VS. FACT #4

MYTH:

Absentee voting by mail is prone to fraud.

FACT:

Iowa has instituted Voter ID at the polls and on absentee ballot request forms to protect the integrity of the vote. Voters are required to enter their Voter ID number on their request form before submitting it to their county auditor. The Voter ID number and the voter's address must match the voter's information in the voter registration database before a ballot can be mailed.
